

COLTON BATTS

Fort Worth, TX · 646-373-6126 · colton.batts@gmail.com · coltonbatts.com · github.com/coltonbatts

SUMMARY

Video editor and motion designer who builds the tools. Ten years as lead editor on national campaigns for Google, Under Armour, Kate Spade and Nuuly — and the author of VCR, a headless motion renderer in Rust that turns YAML scenes into ProRes 4444 with alpha. I work at the seam between the edit and the toolchain, which is why the output arrives fast and repeats. Looking for a full-time role on a team that ships.

BUILT

Working software, published and in use — the same tools the commercial work runs on.

VCR — Author — motion renderer

Motion graphics from the terminal: YAML scenes in, ProRes 4444 with alpha out.

A headless renderer for repeatable motion work — write a scene once, change the data, render the variants. No GUI, no timeline to babysit. Declarative scenes, custom shaders, text and layered compositing, GPU-accelerated on Apple Silicon.

Rust · Metal · open source · github.com/coltonbatts/VCR

ColorWizard — Author — color instrument

From a reference color to a paint mix and a thread match.

An instrument for artists who work in physical materials: sample a color from any image and get a practical oil-paint recipe plus the closest DMC thread. Live as a web app and a desktop build.

TypeScript · React · Next.js · Tauri · WebGL · [colorwizard.app](#)

MagpieApp — Author — craft tooling

A photograph into a thread-matched hand-embroidery pattern.

Runs entirely offline. Built for and used by a working embroidery studio, where the pattern it outputs is the pattern that gets stitched.

Desktop · offline · coltonbatts.com/tools/magpie

coltonbatts.com — Design and build

A self-built publishing system with a WebGL2 darkroom render layer.

Astro site with a custom GPU pass for film grain, halation and develop, plus an automated image pipeline that carries 24 archive photographs and the commercial portfolio.

Astro · TypeScript · WebGL2 / GLSL · coltonbatts.com

SELECTED WORK

“See What I’ve Done” — All Clean (music video)

Director. Featured on Post-Punk.com, which called it “red and green lit Italian Giallo horror and the surreal stylings of David Lynch.”

After Hours — solo photographic show

Dang Good Candy, Fort Worth, 2021.

The archive — 24 photographs, 2021–2022

Published at coltonbatts.com/art. Another 73 frames in the same register span 2012–2025.

Photography — Fort Worth Weekly

On assignment, 2023–2024.

EXPERIENCE

Lead Video Editor — Capture This (Creative Agency)

New York, NY (Remote) · 2021 – Present

- Lead editor on national campaigns for Google, Under Armour, Kate Spade and Nuuly — 30+ delivered assets on the Shop with Google “Back to School” and evergreen work alone, across every aspect ratio.
- Under Armour: edited the “New Rollout” internal training series; cited for narrative clarity and brand guideline adherence.
- Kate Spade: built stylized title and social systems in After Effects to carry a high-fashion look across a campaign.
- Nuuly: designed key props and graphic assets used in the final cuts, not just cut around them.
- Owned the remote proxy workflow and revision cycle end to end; rough cuts consistently inside 24 hours.

Founder & Creative Director — Alternative Design LLC

Fort Worth, TX · 2022 – Present

- Independent studio for film, motion and design systems: scoping, pricing, direction and delivery handled directly with the client.
- Built and shipped the software tools the work needs — VCR, ColorWizard, MagpieApp — when nothing off the shelf did the job.

Multimedia Designer & Video Lead — Freedom Powersports

Fort Worth, TX · 2015 – 2021

- Led print-ready production across retail and events — large-format signage, building wraps, flags and display systems — for multiple OEM brands.
- Produced vendor-ready files to spec (bleed/trim, scale, export settings) and ran proofing through to install.
- Owned the internal video pipeline for six years as primary editor for corporate, training and promotional media.

SKILLS

Editing & Post: Adobe Premiere Pro (expert), After Effects, DaVinci Resolve, Proxy & multi-cam workflows, Color correction, Sound design / mixing

Software: Rust, TypeScript / JavaScript, Python, React / Next.js, Astro, Tauri, WebGL2 / GLSL, Metal, FFmpeg, Git & GitHub

Motion & Design: Motion systems, Title & graphic packages, Storyboarding, Photoshop, Illustrator

Production Design: Large-format print (wraps, signage), Event collateral systems, Vendor proofing, Print-ready file setup
